

Feline Fecal Consistency Scale*

Iams Veterinary Formula® Intestinal Plus
 For Veterinary Use Only

Score	Without Litter	With Litter	Client Description
1			<ul style="list-style-type: none"> • Thin • Watery • Liquid • Runny • Flat • Absorbed by litter
2			<ul style="list-style-type: none"> • Goopy • Slimy • Pudding like • Somewhat watery • Blob • Absorbed by litter
3			<ul style="list-style-type: none"> • Mushy • Semisolid • Soft • Squishy • Litter sticks to most or all of it
4 IDEAL			<ul style="list-style-type: none"> • Firm • Well formed • Solid but moist • Not hard • Some litter sticks to it
5			<ul style="list-style-type: none"> • Solid • Dry • Hard • Dehydrated • Litter does not stick to it

Your end-to-end solution for digestive problems.

Intestinal Plus with TriFiber Technology

Designed to nutritionally manage GI issues in cats, Intestinal Plus addresses most issues including those associated with vomiting and diarrhea. Formulated with TriFiber Technology (TFT), our proprietary blend of FOS, MOS*, and Beet Pulp, these diets help maintain digestive health, microbial balance, and stool consistency. While addressing indications that may benefit from the specific nutritional content, these formulas also provide nutrients to support overall health.

PRIMARY INDICATIONS:

- Vomiting Associated with GI Conditions
- Antibiotic Responsive Diarrhea (ARD)
- Acute and Chronic Gastroenteritis
- Small and Large Bowel Diarrhea
- Colitis
- Inflammatory Bowel Disease
- Constipation
- Dietary Indiscretion
- Megacolon
- Exocrine Pancreatic Insufficiency
- Malabsorption/Maldigestion
- Pancreatitis
- Short Bowel Syndrome

MAY ALSO BE PRESCRIBED TO NUTRITIONALLY MANAGE:

- Recovery Conditions
 - Intestinal Surgery
 - Severe Parasitism
 - Cancer

OVERALL WELLNESS BENEFITS:

- Immune Health: Vitamin E, an antioxidant to help maintain a strong immune system
- Skin & Coat Health: Targeted ratio of omega-6: omega-3 fatty acids
- Digestive Health: Beet pulp, a moderately fermentable fiber, and FOS for a healthy digestive tract
- Dental Health: Crunchy kibble helps promote healthy teeth and gums by scraping away plaque build-up**

*Demonstrated in vivo with species other than cat.
**Dry formula
